

PC-NET Participants,

Congratulations for choosing to be a part of the PC-NET program in your neighborhood. Your commitment to your family and neighbors shows you wish to make a difference in your community. We, at PC-NET, are happy to present you with this workbook. We have adapted the materials that the SDART program developed for use in the Seattle area.

We are currently in the process of making some changes to this manual for the purpose of tailoring it to Pierce County's specific needs. In the meantime, please be assured that the educational content of this manual is valuable, no matter where you live. We will let you know as soon as the updated PC-NET books are available.

We look forward to working with each of you toward achieving your goal of personal and neighborhood preparedness.

SDART's guide to Personal & Neighborhood Preparedness

The consequences of disaster are largely preventable.

This workbook will help you take action *today*.
